## Product Name

### Ultra Cut Cutting Disc Metal/Inox T41 Flat Center

115x1.0x22.23mm

13300 rpm

HS Code:6804221000

## Product Description

Ultra Cut cutting discs are high-performance abrasive tools designed for precision cutting of metal, stainless steel, and other hard materials. Made with premium aluminum oxide, ensure fast cutting, durability, and minimal vibration. The reinforced fiberglass mesh enhances safety and stability. Suitable for angle grinders, these discs provide clean, burr-free cuts with high efficiency. Available in various sizes and thicknesses for different applications. Ideal for industrial, construction, and DIY use. Compliant with international safety standards EN12413.

## Specifications

Specification	Details
Abrasive Material	Aluminum Oxide
Type of League	Organic Resin
Bore Size	22.23mm
Disc Diameter	115mm
Maximum Safe Speed	13300rpm
Thickness	1.0 mm
Reinforcement	2 Fiberglass Meshes
Operation	90° cut
Suitable for	Metal/Inox
Certificate	MPA, ISO, TUV
Color	Black

## Features and Benefits

- ▶ 13300 rpm maximum safe speed
- ▶ Extended lifespan-Dense grain structure reduces wear
- ▶ Smooth cuts- Low vibration design minimizes material burrs
- ▶ Multi-application-Cuts steel, alloys, pipes effortlessly
- ▶ Certified-Meets EN 12413
